Glossary

- **Occupancy:** Calculated by the number of occupied rooms divided by the number of available rooms that physically exist in a hotel
- **Average Daily Rate (ADR):** Represents the average rental income per paid occupied room in a given time period, however, ADR itself cannot be used to measure a hotel's performance
- **Revenue per Available Room (RevPAR):** Calculated by multiplying a hotel's ADR by its occupancy rate, an increase in RevPAR most likely indicates an improvement in occupancy rate and can be used to measure a hotel's performance
