British Columbia – *September Update*

2023 DATA VINTAGE

Purpose

- As the tourism industry navigates recovery from the COVID-19 global pandemic, the British Columbia Regional Tourism Secretariat (BCRTS) continues to provide baseline research to support the industry as it moves forward
- Baseline visitor analysis will help the industry understand who is visiting our regions so they can plan strategically how and what visitors to attract
- Research commenced with the **International market** by **region** and **country**
- This report focuses on visitor analysis to **British Columbia**

Research Overview

- **Environics Analytics** (EA) is a Canadian based research firm providing information solutions for a variety of industries in both the Canadian and USA Markets
- VisitorView provides insights the tourism industry needs to understand, market and grow their business with International travellers
- Estimates are provided for the **total number of trips** and the **number of nights spent** in each province or tourism region. Unlike Domestic or USA visitation, International has only trips and nights. Not unique visitors. EA assumes because of the great distance they're coming for a trip, they're a unique visitor.
- VisitorView is based on anonymized, consent-based mobile location data. Monthly, quarterly and annual estimate data is available starting with January 2020 to allow for analysis of historical trends
- Environics is certified **Privacy By Design**. These certifications provide certainty that privacy considerations are embedded into every aspect of products and services.

Methodology

- **Trips:** Are defined as the count of traveller trips which involved spending one or more nights over the time period as part of a continuous visit to the destination.
- **Nights Stayed:** Is defined as the count of unique nights a domestic visitor was observed in the destination over the time period (between 6:00pm – 8:00am the following day)

Average Nights by Trip

A scenic landscape featuring a large brown bear standing in a grassy field near a body of water, with a dense forest and mountains in the background. The bear is positioned in the middle ground, facing right. The foreground is filled with lush green grass and some fallen logs. The background shows a vast, dense forest covering a valley, with mountains visible in the distance under a slightly hazy sky. The overall atmosphere is peaceful and natural.
